Prepared: 13 January 2026 • For grant bodies, lenders and strategic partners

Who we are

KV Smartflow is a BIM-led MEP delivery business providing coordinated design, installation and maintenance supported by a system-led operating model.

What we do

- **BIM coordination:** clash detection, coordinated drawings and installation-ready information.
- **MEP delivery:** installation, commissioning, and planned/responsive maintenance.
- **Integrated supply support:** local procurement and stock support to reduce downtime (where applicable).

How we deliver

- **System-led execution:** SOPs, QA gates and evidence packs.
- **Clear accountability:** defined roles and decision authority; consistent communication.
- **Compliance-first:** health & safety, quality checks and documentation.

Typical clients

- Housing providers and property management organisations.
- Facilities management and commercial clients.
- Public sector and council-aligned programmes requiring audit-ready reporting.
- SMEs requiring reliable MEP delivery and responsive support.

Why KV Smartflow

- Reduced rework and clearer installation outcomes through BIM-led coordination.
- Faster response supported by local supply resilience.
- Governance and ESG alignment suitable for public sector procurement expectations.
